CWB's standard Program Learning Outcome

For program evaluation, the CWB's standard Program Learning Outcomes (PLOs) are structured as follows:

- **Domain:** General
- **Level:** Basic
- **Learning Outcomes:**
  - Understand the fundamental principles of the domain
  - Apply basic skills to solve problems in the domain

**Design Based on the PLOs:**

- The program design incorporates these outcomes to ensure that students achieve the proficiency levels expected.

**Assessment and Evaluation:**

- The assessment methods are designed to measure the achievement of these outcomes.

**Course Content:**

- The course content is organized to align with the PLOs, ensuring comprehensive coverage.

**Implementation Strategies:**

- Strategies include lecture, discussion, and project-based learning to facilitate mastery of the PLOs.

**Continuous Improvement:**

- Regular feedback mechanisms are in place to refine the program and enhance student outcomes.

**Support Systems:**

- Support is provided to ensure that students can effectively achieve the PLOs.

**Future Considerations:**

- Future updates to the program will consider new developments and technologies to further enhance the learning experience.
