F. W. and Elsie L. Heyl Graduate Fellowships
for graduate study in certain disciplines at Yale University

Terms
The Heyl Graduate Fellowship at Yale University provides full tuition and health benefits plus a stipend determined by the graduate program of study. The fellowship is renewable for up to four years.

Eligibility
Any Kalamazoo College graduate with a major in one of the exact sciences—chemistry, physics, biology, mathematics, computer science, or any cross-disciplinary combinations of any of the foregoing—and who is a candidate for a Ph.D. degree in an eligible field at Yale University.

Eligible fields of study
Ph.D. programs in Chemistry, Physics, Engineering and Applied Science, Molecular Biophysics and Biochemistry, Pharmacology, Astronomy, Geology and Geophysics.

It should be noted that Chemistry majors pursuing graduate study in chemistry will take precedence over applicants with other eligible majors and that graduate programs in chemistry, physics and engineering take precedence over other eligible programs.

How to apply
Submit to Dr. Diane Kiino, Executive Director of the Heyl Scholarship Fund, by February 12, 2017, a letter of intent stating your intended program of study, reasons for considering Yale’s program, and your professional goals.

Submit by April 1, 2017:
1. a letter of evaluation from a faculty member in the department of your major discipline.
2. a copy of your letter of acceptance to Yale University’s graduate school; this should include your intended program of study and the degree sought.
